-According to the European Directive 91/156/CEE Article 15 about waste removal in the apparatus, the responsibility for waste removal lies only on those who have created it.

-According to the European Directive 89/391/CEE Section II Article 5 Point 1, the employer is responsible for guaranteeing the safety of the workforce within the workplace.

In accordance with the above mentioned dispositions, we ask for your collaboration regarding material sent to us with reference to the norm and taking into account:

A- That all the instruments sent to Tecfluid to be repaired, checked etc. should be exempt from all kinds of harmful substances.

B- That all the instruments to be sent to Tecfluid should be accompanied by an attached certificate, confirming that its handling will be safe and indicating the type of fluid used with the equipment, or the precautions to be taken and the protective materials to be used for its cleaning.

Tecfluid will accept the instruments to be repaired or checked etc. which do not entail any personal risk, or are harmful to the environment.

Tecfluid will return to the sender any material which presents signs of contaminant substances or those which do not enclose the corresponding cleaning certificate.

Likewise, if non-harmful substances are identified, the instrument will be cleaned and the owner will be charged for said cleaning.
